

January 30, 2008

To: Customers of Trazar Corporation

Subject: Licensing Agreement between Trazar Corporation and Tara Technologies Corporation

Trazar Corporation is pleased to announce that it has entered into a strategic licensing agreement with Tara Technologies Corporation. Under this agreement Tara Technologies will be the exclusive licensee for manufacturing, service and marketing of Trazar's proprietary products and services. Tara Technologies designs, manufactures and tests components and systems used in critical applications for the world's leading manufacturers in the Semiconductor, Aerospace, Military, Energy and Medical markets. Tara Technologies is headquartered in Daytona Beach, Florida, with manufacturing facilities in Florida, California, and Singapore and with sales offices and a distribution network across the US and worldwide.

The licensing agreement is scheduled for implementation effective February 1. To assure consistency of product and continuity of supply, Trazar personnel will transfer to Tara Technologies' facility in the Bay Area. Products will be manufactured by the same employees on the same equipment, using the same processes, and referencing the same part numbers. Tara Technologies also intends to use the existing Trazar supply base for components to ensure transparency during the transition period.

During the month of January 2008, Trazar will continue to accept orders for normal delivery. After February 1, 2008 orders should be placed directly with Tara Technologies. Any order that is not shipped by Trazar before February 1, 2008 will be assumed and delivered by Tara Technologies. If you have any questions please contact Trazar or Tara Technologies customer service representatives at the number or email provided below. Tara Technologies will also be contacting you directly to answer any questions that you may have, and to facilitate setting up the new relationship.

Trazar Corporation will concentrate on product development. Trazar will also redirect all requests for products and other contacts to Tara Technologies during the transition in the coming months to ensure that your requirements are met. You can count on the same commitment that we have shown to you and the needs of your organization.

My staff and I would like to thank you for the business as well as the support that you have given Trazar during the last 20 years. I have every confidence that you will enjoy an outstanding relationship with our new strategic partner – Tara Technologies Corporation.

Best Regards,

Eswar Subramanian
President, Trazar Corporation
