TRAZAR PASSES ISO AUDIT WITH ZERO CORRECTIVE ACTION REQUESTS (CARs) FOR FIFTH CONSECUTIVE TIME

SANTA CLARA, CA, August 30, 2005—Once again and predictably by now, Trazar Corporation has recorded its fifth consecutive International Standards Organization (ISO) 9001:2000 surveillance audit with ZERO Corrective Action Requests (CARs).

Based on the requirements of the ISO 9001:2000 Business Management System and audited every six to eight months, Trazar has once again received this prestigious acknowledgement of its manufacturing efficiency, integrity and reliability.

"Even though management and quality go through the process each time, each audit includes a new set of personnel. So we approach each audit as if it were the first one. Nothing is taken for granted," said Ken Warburton, CEO.

"The commitment to quality is a key element of our overall business strategy--it is not a top-down management directive. It is accepted and practiced by everyone in the company. Everyone takes this seriously," Ken added.

"As we always say around here, 'if it is worth doing, it is worth doing well.'"

The ISO 9001:2000 Business Management System is a collection of quality control and assurance principles and guidelines governing customer and employee interaction, process management, supply chain relationships. It is an ongoing, continued systemic evaluation that is holistic as it takes into account the entire organization in addition to products and services.

Trazar

Trazar, Inc., is a provider of RF delivery systems for the semiconductor and medical equipment industries. The company's RF Matches boast an industry-leading and proven 44 months MTBF. Trazar provides repair and maintenance services through its RF Services group for their own and other manufacturer's products. The company also offers specialty contract manufacturing for high-quality, moderate volume customers that want access to its RF experience and expertise. Trazar was founded in 1987 and is based in Santa Clara, Calif., with repair and sales offices worldwide. For more information, visit www.trazar.com.
